

User notes for Mobile Application

1. Installation of a mobile application on smartphone

1.1. Apple <https://itunes.apple.com/cz/app/sport-timekeeping/id1113625384?!=cs&mt=8>

To search in IOS Store: Sport Timekeeping

QR-Code:

1.2. Android: <https://play.google.com/store/apps/details?id=cz.ackee.stopwatch>

To search in Google App Store:

QR-Code:

2. **Ensure that your device is 100% charged.** Provide an additional battery if necessary and/or alternative power source (e.g. USB or Solar).
3. Request your **6 digit Private Key** (must be created by event organizer and loaded onto the ORGSU system on the page “Timing Scenario”). **Request your 7 digit Security Key**, which was generated by ORGSU when the Timing Licence was purchased or ordered.
4. Run your ORGSU application and enter both codes. Record all devices to be used on a Race Day and **provide the LOGIN for all simultaneously**. Use an alternative mobile phone to instruct a crew member should he/she be required to provide a LOGIN.

5. STARTING of the Race/Wave

Select "STARTING" from the main menu

- Select one of the **Races/Waves** from the list.
 - Press "START play button" when the actual race begins.
 - If an error occurs, the start may be deleted and begun again.
 - If more than one race starts simultaneously, additional mobile applications must be used, or the start time entered manually into the system in a "Race Management Page".
 - When START is provided, use the back arrow to return to the main page.

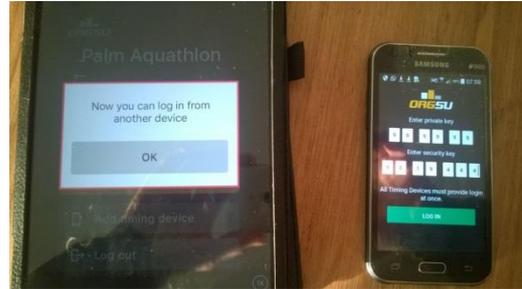

6. TIMING

Select "TIMING" from the main menu

- Select one of the **Timing Spots** from the list
 - **Click "Start number"** via the digit keyboard provided and **click "Time"** to load it into the system.
 - Or **click "Time"** and a blank row will appear. Do this several times if required. Next, hover over the blank cell position and a keyboard number may be added and confirmed by clicking **"ENTER"**.
 - Or **Type Start Number** via the digit keyboard and confirm this by clicking **ENTER**. BIBs will appear above and, instead of technical times, the "TIME" cell will appear in each row. Do this several times as required (e.g. you see 3 athletes approaching simultaneously and can recognise their BIBs.) As an athlete passes, touch only the TIME cell in the rows above; these will immediately change to the Technical Time.
 - When an error occurs, simply correct manually in the system. Make a note of the error.
 - You may **scroll / move** the (BIB -Time) lines by touching and moving this area on your smart phone.

7. Log out of the application if required. You may log in during the same Race Day again.

8. **Adding another “New Device(s)”** to be synchronized may be done as follows:
- Press “Add another device” on any synchronized Device. The message “Now you can log in from another device” should appear. If not, your “Origin Device” is not yet synchronized.
 - Prepare the home page with Private and Security Keys
 - Press simultaneously:
 - “...” on the “Origin Device”
 - “login” on “New Device(s)”

9. FAQs

Should I differentiate between races when time keeping?	No. Simply record all athletes’ BIBs as they are approaching and passing around at the given Timing Spot. The system will take care of the rest.
Must a specific device be used for measuring a particular start / wave?	No, it does not matter which device is used.
Can we provide timing via more devices at the same timing spot?	YES. This is recommended, especially when there are more athletes at the start point. Use more, rather than fewer, devices, as this results in multiple athlete times and avoids the possibility of missing someone.
<p>Can we provide timing manually with stopwatch/digital watch, PEN and PAPER?</p> <p>Can we combine it with a smartphone timing?</p>	<p>YES, you can combine it with smart devices as well. Note the “Timing Spot Name” and provide 2 columns:</p> <p>Left column BIBs --- right column Day Time</p> <p>This handwritten record must be given to the central “computer”, where the Z-method may be effectively used for the entering of such records.</p>

TO BE PRINTED ON THE WALL. Keep the font size and all tables as advised please:

Name of the race, e.g.:

Bestmed CHOKKA Trail

you can use logo ORGSU if you like it

make a print-screen of your keys:

PRIVATE KEY

SECURITY KEY

All must be changed into your Race Day:

A) BIBs (Start Nr.) Assignment

RACE	BIB from	No Athletes
Name	1	134
Name	150	34
Name	190	27
...

B) Timing Spots
