

FREE Licence

- It is easy for users to test basic functionality of the ORGSU system via FREE LICENCE.
- This free licence provides limited access, with the most important functions restricted.
- FREE Licence restrictions: A total of 2 events, 5 Races may be launched. A total of 10 athletes may be added to a single race. It is also not possible to add split times to your race(s) and no financial transactions may be conducted.
- A FREE licence is provided automatically; there is no need to order it via the Licence e-shop.
- Timing may be provided via the FREE licence. You must order a timing licence to activate this – no payment will be required for the test timing then
- Your FREE Licence is signalled by the red target on the right upper corner of the administrator work page.

ORGSU Licence

- An ORGSU Licence is required for general work within the system in the selected company profile.
- The Licence price is payable per year.
- The price is provided individually for each country and currency and may be found on the system's licence e-shop. Licences vary according to validity length and % operation fee.
- The operation fee is given as a share of the whole turnover generated by Entry fee due and e-shop turnover. The minimum entry fee price is applied for each currency.
- A licence may be accessed and purchased only after a company profile has been registered.
- The following company profiles are currently available:
 - **Event Producer**
 - **Series Producer**
 - **Digital Marketing / Media**
 - **Timing Company**

Timing Licence

- A Timing Licence is needed to gather technical times during races (from various timing technologies) and calculate the results of **all races of a race day**.
- The Timing Licence allows a holder to provide a timing and deleting of all data to get confidence before the real event.

Licence Ordering

- The Timing Licence must be ordered before the race day and paid for after the event.
- There is a unit price based on the timing of each athlete.
- The higher the number of athletes in one day, the lower the unit price.
- The unit timing price varies with the country and currency. Details are published inside the system.
